Agricultural chemicals
Wine and other alcoholic beverages
Automotive fluids - Oil
Cleaning products
Coffee and tea
Olive oil
Juice
Water

MAINTENANCE / CLEANING

Ideally, maintenance should be carried out once a year, namely the belts and removable elements as well as the inspection of the glue machine.

MAIN FEATURES

SOLUFORM 100 is prepared to work with boxes from 1 to 20 liters, having been developed to minimize the cost of changing time between different boxes (about 15 minutes).

Due to its compact design, it is extremely versatile and adapts to any layout.

In the glue drying zone, a box pressing system is used instead of the traditional rollers, reducing downtime for cleaning the equipment.
