MAINTENANCE / CLEANING

Ideally, maintenance should be done once per year, namely hoses, seals, and gaskets.
Cleaning (Purge / CIP) must be done before and after the filling.

MAIN FEATURES

The SOLUFILL 400 is an automatic device for filling in a Bag-in-Box (BIB)® a system that only needs one operator. Its great advantage is the filling volume that allows and reduced time.

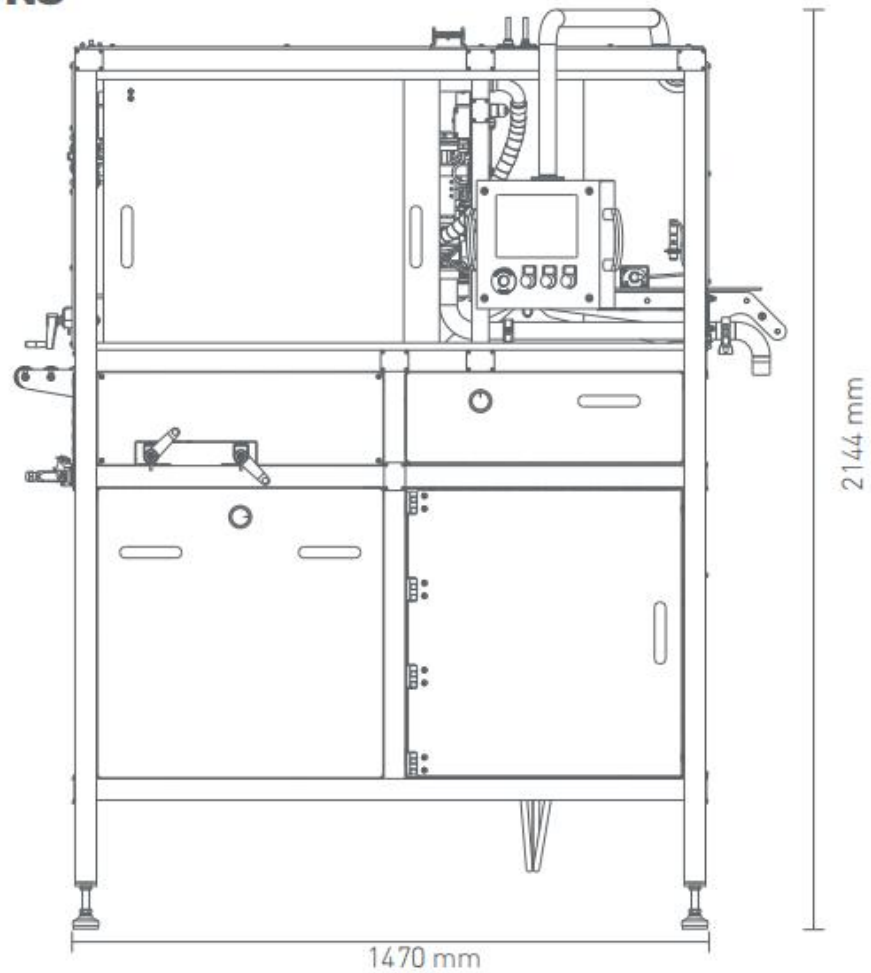

For better product conservation, at the beginning of the filling it uses a vacuum system and in the end, nitrogen injection.
